Downtown Improvements

We are happy to announce work will begin soon on crosswalks at the intersection of Main and Mill Streets and the intersection of Main and Third Streets.

First, construction will be done to each of the intersection's four corner sidewalks to make them ADA compliant. No street closures will be necessary for this stage of the project.

The second part of the project includes pouring tinted concrete, which will be stamped to look like brick, in the crosswalks at these intersections. During this stage, Main Street will have partial closures between and around these intersections. This stage of the project should only take about 4 weeks, pending no interruptions from inclement weather.

We thank you in advance for your support of this project. Together, we are making our city a better place to live and work! For more information, please feel free to call City Hall at 939-8600 ext. 211.
