

ILLINOIS MUNICIPAL
ELECTRIC AGENCY
ELECTRIC EFFICIENCY
PROGRAM

**Waterloo Electric Department Commercial/Industrial Customers are Eligible for
Cash Incentives for Installing More Efficient Lighting and Equipment**

Electric efficiency projects undertaken by a commercial customer of Waterloo's electric utility may qualify for an incentive reimbursement through the Illinois Municipal Electric Agency's (IMEA) Electric Efficiency Program. Commercial, industrial, institutional, local government or non-government (schools, parks, museums, etc.) customers are all eligible to apply.

Eligible Projects

Examples of projects that might qualify include installing more efficient T8, T5 or LED interior or exterior lighting. Additional applications soon will be available for such measures as refrigeration; programmable thermostats; air compressors; and efficient fans and motors projects.

To be eligible for an incentive, applicants must submit a pre-application before starting their electric efficiency project.

Check: <http://www.imea.org/EEProgram.aspx> for details.

Program Funding

Funding for this program is provided by the IMEA through their partnership with the City of Waterloo. IMEA provides wholesale electricity to the Waterloo and manages this program.
